

Safe and effective antimicrobial surface treatment applied annually rendering surfaces inhospitable to viral and bacterial microbes

CREATE A SAFER ENVIRONMENT

WITH UNITED SAFETY'S NANOTECHNOLOGY SURFACE PROTECTOR

- AEGIS®, used along with CDC- recommended cleaning cycles, can help eliminate viral and bacterial pathogens
- Bonds to surfaces creating a bed of spikes that puncture the cell wall of germs, acting as surface protector preventing the spread of microbes
- Safe and effective antimicrobial technology proven to eliminate odor-causing bacteria
- Used in and suitable for many industries
- Destroys viruses and bacteria on contact
- Non-traditional disinfectant that is invisible to the eye, leaving behind no residue and having no impact on treated surfaces
